IPL Treatment at the  
Olelo Clinic

IPL Skin Rejuvenation is a quick and highly effective way to improve skin tone while producing firmer, smoother and younger-looking skin. Sun-damage, acne and other factors can cause pigmentation, age spots, red and uneven skin tones, resulting in a tired, aged complexion. We use a Lumenis IPL system to deliver light energy to effectively treat the damaged layers of skin whilst avoiding damage to the surrounding tissues.

#### What are the benefits?

- Younger looking skin
- Reduction or removal of freckles and pigmented lesions
- Reduces redness and visible blood vessels
- Increased firmness
- Reduces oily skin and breakouts
- Improves Rosacea symptoms
- Improve dry eye

#### How does it work?

IPL delivers pulses of light energy. This can be delivered to different depths within skin tissue, to act on melanin, (responsible for skin pigmentation, sun spots,) or to close abnormal blood vessels ( such as with spider veins) or destroy hair follicles.

IPL heat delivery will also help regenerate collagen, leading to firmer, rejuvenated skin.

#### What are the costs?

Drug free treatment for Dry Eye	from £115
Styes	from £75
Facial rejuvenation	from £150
Sun spots	from £
Broken blood vessels per region	from £50
Rosacea	from £150
Acne scars per region	from £50
Thread veins per region	from £50
